

„Mild Oxy Combustion for Climate and Air”

Scientific seminar

2nd December 2016

Institute of Thermal Technology,
room 200B, Konarskiego 20, Gliwice

Seminar program:

9⁰⁰ Welcome

9⁰⁵ Information about the project and consortium

9²⁰ DNS model of a single particle combustion and it's implementation to the RANS approach

10¹⁰ New method and stand for measuring pulverized coal kinetic data

11⁰⁰ Coffee break

12⁰⁰ Real Scale Mild Oxy combustion boiler simulation

12⁵⁰ Exergo-ecological assessment of a real scale boiler and plant

13⁴⁰ Summary

For registration and more information please contact
Sławomir Śladek at +48 32 237 2340 or slawomir.sladek@polsl.pl,
the number of participants is limited.
